Best Practice Erosion and Sediment Control Training

EROSION AND SEDIMENT CONTROL TRAINING

Our IECA Approved Erosion and Sediment Control Training will provide participants an understanding of erosion and sediment control design, construction, and maintenance to ensure your site complies with relevant legislation, resource consents and Erosion and Sediment Control Plans.

The content of this course is based on the Erosion and Sediment Control Guidelines for Land Disturbing Activities in the Auckland Region, GD05. The course also draws on SouthernSkies experiences on sites throughout Australasia.

COURSE CONTENT

- Introduction to the effects of sediment on NZ's uniqueness.
- Overview of legislation and consequences
- Introduction to erosion and what influences sediment yield
- Erosion and Sediment Control Guidelines
- Sediment Control Management Practices
- Specific Activities- Dewatering and Streamworks
- Introduction to Preparing and Assessing ESC Plans
- Site Management

ABOUT US

SouthernSkies Environmental Limited provides leading environmental and erosion and sediment control training throughout New Zealand.

Erosion and sediment control training courses have been approved by the International Erosion Control Association (IECA).

This course is delivered by Gregor McLean. Gregor is a Certified Professional in Erosion Sediment Control (CPESC) and has been a previous CPESC examiner for the International Erosion Control Association (IECA) Australasia. Gregor has many years' experience in delivering Erosion and Sediment Control Training, consenting, and implementing large residential and infrastructure projects throughout New Zealand.
